PROFESSIONAL SUMMARY

Vision- driven change agent with a career- long record of full - stack software development, programming, and project management success for leading organizations

Senior Full-Stack & AI Engineer with strong experience building production grade LLM applications, scalable backend systems, and end-to-end digital products. Proven ability to translate ambiguous business requirements into working solutions, leveraging AI, data pipelines, and modern full-stack technologies.

Experienced in developing agent-based systems, MCP integrations, and AI-driven workflows, with a focus on reliability, evaluation, and real-world applicability. Strong track record of leading technical initiatives, mentoring engineers, and delivering high-impact solutions in fast-paced environments.

CORE COMPETENCIES

- LLM System & AI Agents
- Full-Stack Development
- Training & Development
- Distributed System
- Backend Engineering
- CI/CD
- Data Pipeline
- Team Leadership
- Cloud Platforms
- UI/UX Design
- Quality Assurance
- Issue Resolution
- Project Coordination
- API Design

PROFESSIONAL EXPERIENCE

Mercor, JAN 2025 TO PRESENT **AI ENGINEER**

- Improved AI model training stability, consistency, and throughput, resulting in more reliable development cycles
- Enabled deployment of key LLM-driven features by designing and implementing robust MCP integrations
- Influenced architecture decisions across multiple AI systems through technical leadership, design proposals, and code contributions
- Designed and implemented MCP (Model Context Protocol) servers enabling LLMs and AI agents to safely interact with simulated real-world tools
- Built high-fidelity application simulations that replicate real app behavior, outputs, and workflows for agent tool-use learning
- Engineered deterministic backend environments to ensure reproducible model experiments and safe tool interaction
- Improved model training stability and throughput, optimizing data pipelines, evaluation workflows, and training logic
- Developed hybrid live/offline data integrations for realistic yet controlled agent experimentation

- Created and maintained unit tests, behavioral parity tests, and validation frameworks to ensure API and workflow

NABTECH LTD. APR 2022 TO DEC 2024

SENIOR SOFTWARE ENGINEER

- Led a team of Engineers to Develop a Virtual Health On Demand Application (VHOD) for Common Spirit Health. This application Allows patients to Request a Virtual Visit, and The Appropriate Provider will connect with Them.
- Worked on a few mobile app projects with React Native, Expo, and EAS, e.g., Fixy app, common Spirit app, sports metrics, and clerestory.
- Leverage coding expertise to contribute to Enterprise applications using programming languages, tools, and concepts, including Python, JavaScript, Node JS, C#, and respective frameworks (Express, React JS, React Native, Expo, EAS, GraphQL, Next JS, Angular JS, AWS, .Net Core).
- Assist developers in resolving issues and challenges while performing day-to-day software-related tasks.
- Align objectives and bridge communications with talented engineers to develop high-quality products.
- Demonstrate strong knowledge of programming practices, OOP concepts, Agile Methodology, component reusability, code reusability, and proper coding style guides, including Airbnb style guides.
- Spearheaded the development of the Twilio Provider app that allows patients and providers to connect using Twilio Video.

CODEMONTOR, DEC 2017 TO DEC 2022

FREELANCER AND EXPERT MENTOR

- Leverage coding expertise to mentor and instruct working developers on programming languages, tools, and concepts, including Python, JavaScript, Node JS, C#, and respective frameworks (Express, React JS, GraphQL, Next JS, Angular JS, .Net Core).
- Assist developers in resolving issues and challenges while performing day-to-day software-related tasks.
- Conduct in-depth code reviews in support of developers and projects.

ANDELA NIGERIA, LAGOS, NIGERIA, FEB 2014 TO MAY 2019

FULL-STACK WEB DEVELOPER

- Oversaw developing and maintaining new and old software owned by Andela/Andela Partners.
- Managed the codebase and supported new & innovative projects with most applications built with React JS, Node JS, and Material UI.
- Played a vital role as a team member in building the Andela Learning Map to guide Andela developers in selecting career paths and tracking growth using React JS and Material Design for the front end and Flask and SQLAlchemy for the back end.
- Promoted the development of a positive and knowledgeable work environment by training and mentoring junior developers and development boot camp participants.

TECHNICAL PROFICIENCIES

- **Programming Languages:** Python, JavaScript/Typescript, Java, C/C++

- **Web & UI Technologies:** HTML, CSS, SCSS, React.js/React Native, Angular, Next.js, Tailwindcss, Redux, Material UI, Material Design
- **Web Server Technologies:** NodeJS, Deno, Bun, Express JS, GraphQL, G R P C , TRPC, Prisma
- **Version Control:** Git, GitHub, Bitbucket, Git Lab
- **Databases/Data Store:** RDBMS (Postgresql, Mysql, SQLite), NoSQL (Firebase Firestore/Realtime Database, MongoDB, DynamoDB, Cassandra), Graph based (Neo4j), Redis, Memcached.
- **Object Relational/Data Mappers:** Sequelize, TypeORM, Prisma, Knex, Mongoose, ActiveRecord, SQLAlchemy.
- **Cloud/Deployment Platforms:** AWS, Google Cloud (GCP), Digital Ocean, Heroku, Firebase Cloud, Netlify, Render, Dokku, Vercel.
- **Data Transport:** HTTP (REST API, GraphQL), Websockets, RPC.
- **Architectures:** Monolithic, Microservices, Serverless, Monorepo.
- **Payment/Subscription:** Stripe, Plaid, Paypal, Google Pay, Apple Pay, Square, Marqeta, Authorize.net, Braintree.
- **Paradigms:** Object-Oriented (OOP), Functional, Event-driven, Concurrent, Modular, Declarative.
- **Project Management Tools:** Jira, Trello, Pivotal Tracker, InVision, Figma
- **Mobile Technologies:** React-Native, Expo , EAS, Xamarine • **Testing:** Jest, Mocha, Chai, Jasmine, Pytest, cypress.
- **Containerization:** Docker, Kubernetes, Podman

Others: LLM, Ollama, Pytorch, OpenAI, Gemini, Claude, Claude Code, Cursor, Agile (Scrum, Kanban), Algolia, Algorithms, Amplify, Apache Spark, Apollo, Automation, Azure, Babel, Blockchain, Caching, CDN, Chrome Extensions, CI/CD, CircleCI, CloudFront, Cloudflare, CloudWatch, CMS, Code Review, Cognito, Containerization, Critical Thinking, CRM, Cypress, Datadog, Data Streaming, Debugging/Troubleshooting issues, DevOps, Documentation, EC2, E-Commerce, ElastiCache, Elastic Beanstalk, ES6, Finance, Generative AI, Git, Google gRPC, Sheet Integrations, Kaa, Kubernetes, Lambda, Logging, Linux, NPM, Open Source, Optimization, Playwright, Puppeteer, RDS, RxJS, S3, SaaS, Salesforce, Sanity.io, SDLC, Security, Schema Design, Selenium, Sentry, Shell, Shopify, Slack, Snowflake, SNS, SQS, Terraform, TravisCI, Twilio, UI/UX, Version Control, VPC, Web3, Webhooks, Webpack.

SOFT SKILLS

- Fast learner (**contributes to codebases from day one at work**), result-oriented and usercentric.
- Strong problem-solving and mentoring skills.
- Excellent communication with stakeholders.
- Superb attention to detail/debugging skills.
- Collaborative/Team-player/Teamwork.
- Adaptability and resilience.
- Great time management and prioritization skills.
- Empathetic and emotionally intelligent. • Self-motivated and accountable.
